

REFERRAL SERVICES

The Minster Equine Veterinary Clinic offers a high quality referral service for all equine cases. Our clinic is equipped with top quality diagnostic and surgical facilities in order to provide the highest quality of patient care.

We provide 24hour referral and emergency service, overseen and supervised by one of our highly qualified team of veterinary surgeons, experienced in all areas of equine medicine and surgery. We consider continuous care and monitoring as the priority for all our patients. Our two in-house interns together with a dedicated nursing team provide round the clock care and monitoring for all in-patients. Our in-house laboratory also allows immediate information on clinical pathology and bacteriology results that permits prompt decision-making on all our cases.

Communication with referring veterinarians and clients is a key priority of our service. Attention is paid to your needs and requests in order to provide the best care in all situations.

LAMENESS AND DIAGNOSTIC IMAGING

Lameness diagnostic service

Our team prides itself on a high standard of orthopaedic workups. Our clinicians have vast experience in all types of lameness and diagnostic imaging.

Radiography service

You may send cases for diagnostic radiography and expect a full report and discussion of the case.

If you would like a second opinion on your radiographs, in digital or conventional format, you can send them to us free of charge.

IRap (Interleukin-1 receptor antagonist)

We are now performing joint treatments with Irap (autologous conditioned serum). Please see the attached summary of its uses and scientific background.

PRP (Platelet Rich Plasma)

We are also performing treatments with PRP. Attached is a summary of its uses and scientific background.

SOFT TISSUE

We have highly experienced clinicians in all types of upper airway surgery and diagnostics. We are performing surgeries such as laryngoplasty ('Tieback') and laryngeal advancement ('Tie forward') on a regular basis on our first opinion cases as well as cases referred to us from all over the North of England.

Laser Surgery

A diode laser has recently been acquired and is in regular use both in first opinion and referred upper respiratory cases. The advantages are that there is no surgical incision, no general anaesthetic, better visualisation of the surgical field, shorter convalescence and faster return to work. Procedures performed by laser surgery are: epiglottal entrapment, vocal cordectomy and ventriculectomy, sub epiglottal cysts and axial deviation of the aryepiglottic folds.

INTERNAL MEDICINE

We provide a high quality internal medicine referral service. A 3-metre video endoscope allows identification of gastric ulceration and collection of duodenal biopsies, and can also be used for cystoscopy, abdominal ultrasound, investigation of hepatic and renal disease, weight loss, chronic colic, cardiology work ups (including echocardiography and exercising ECG), neonatology, dermatology and poor performance cases, are just some of the areas regularly covered.

DENTISTRY AND DENTAL SURGERY

All aspects of dental disease can be dealt with at the clinic. From routine dental assessments and treatments through to remedial work on occlusal abnormalities, diastema

widening and treatment of periodontal disease. We can perform oral extraction or, where necessary, surgical removal and treatment of associated sinusitis conditions.

REPRODUCTION

We accept mares for investigation of infertility. Uterine washings or endometrial swabs for bacteriology/cytology, endometrial biopsy, ultrasonography and hysteroscopy are some of the diagnostic procedures available. Repair of all types of foaling injuries. Ovariectomies can be performed by laparoscopy or laparotomy. During the foaling season we are prepared to receive dystocias and perform a caesarean section if necessary. We also offer packages for insemination with chilled or frozen semen.

SURGERY

Our team of specialists will see all types of surgical cases: arthroscopic surgery, fracture fixation, tendon and ligament surgery and neurectomies, upper airway surgery, abdominal surgery including laparoscopy, dental and sinus surgery.

EMERGENCY SERVICES

We provide a high quality referral emergency service and care for all types of cases.

We also provide 24 hour veterinary care of inpatients by a veterinary surgeon and are equipped for all types of surgical emergencies.

When contacting us out of hours you will reach a veterinary surgeon directly.

CASE DISCUSSION, ADVICE, REGULAR MEETINGS AND CPD

Referring veterinary surgeons are welcome to attend the workups of their cases in the clinic. Please arrange this prior to booking in the case.

We arrange regular CPD and discussion evenings with internal and external speakers. Please send us your contact details if you are interested in further information.

Do not hesitate to contact us to discuss any case if referral is not an option. We are available to speak to colleagues at any time.

Ensure the best care for your cases by working with us, we commit to working together to provide the highest standards of clinical care.
